

Right for **today,**
ready for **tommorrow.**

What your business needs today may not be what it needs tomorrow. That's why Knology offers two crystal-clear fiber-based voice application options designed to meet the needs of any size business. Backed by local, outstanding customer support 24/7.

Knology
Matrix

Knology MatrixSM
**Your One Connection to
a Turn-Key Solution.**

For businesses seeking a full-service, direct-to-desktop solution, Matrix can take you to the next level. Matrix is a managed, eminently scalable, all-in-one voice system over fiber that requires no system capital investment. Simply connect your office to Matrix and you're good to go with the boundless capacity of fiber.

Knology Matrix delivers:

- Simplicity. A single fiber connection
- Security. Through Knology's private, secure network
- Flexibility. No capacity issues, easily add, move or change voice lines
- Affordability. There's no network equipment to buy, or network managers to hire
- Software upgrades are handled remotely at no additional cost

Advanced features include:

- Guaranteed call delivery
- Web portal access to manage your communications the way you want.
- Call management options such as "find me-follow me" that lets you program your phone to ring to another number when you're away from your desk.
- Conference calling
- Four-digit dialing between your facilities
- Keep the same phone numbers

Traditional telephony services

Traditional voice services are designed for PBX connectivity, using Primary Rate Interface (PRI) and deliver Direct Inward Dial (DID) capability, including all the features you need and expect: Caller ID, Call Waiting and multi-functional voicemail.

Knology
iPlex

iPlexSM
**Boundless capacity.
Unlimited flexibility.**

Our latest, innovative voice solution delivers virtually unlimited capacity and flexibility through a single fiber connection. iPlex unleashes the power of an IP-PBX system and allows businesses total control over their communications. You'll enjoy simplicity, savings, security and speed like never before.

iPlex delivers:

- The standards-based single connection for your IP-PBX
- Speed. All the bandwidth you'll ever need
- Security. Advanced, privately managed fiber network
- Scalability. Easily add/subtract voice lines in just a few minutes

Sophisticated features include:

- Unlimited DIDs through a single connection
- No need for gateways or separate analog lines or digital circuits
- Call traffic monitoring. Track patterns to uncover missed opportunities
- Keep the same phone numbers
- Software provisioned. Add or remove capacity as needed
